

Angela Hospice Aides are here to help!

When a Hospice Aide visits your home, feel free to ask any questions at any time. We are more than happy to help! We can educate you on proper body mechanics when moving and lifting, show proper ways to use medical equipment, guide you and assist with simple wound care or wound prevention.

If we don't have an answer we will make sure to direct you to someone from Angela Hospice who can assist you, whether it's a nurse, social worker, spiritual care, or another member of our interdisciplinary team.

At Angela Hospice we are a team working together to provide you with the best care possible.

Please contact Angela Hospice anytime if you have any questions or concerns
(888) 464-2341

Angela Hospice is a Felician-sponsored ministry.

Personal Care Needs

How your Hospice Aide can help

Hospice cares for the entire family. The goal of hospice is to keep patients as alert and pain-free as possible, allowing them to live the remainder of their life in comfort while surrounded by the people who love and care for them.

Our Hospice Aides are highly trained in end-of-life care. They will treat you and your family with compassion and respect in a professional manner.

Hospice Aides can provide these caring services for your loved one in the comfort of their own home.

PERSONAL CARE

- Bathroom assistance.
- Bathing (bed bath, sponge bath, or shower).
- Dressing.
- Skin and nail care.
- Oral hygiene.
- Shaving.
- Wound prevention.
- Simple wound care treatment.
- Oxygen therapy.

DIETARY ASSISTANCE

- Assisting with meals.
- Food preparation.

RESPIRE

Respite care is short-term care given to a hospice patient to allow the primary caregiver a break.

A Hospice Aide from Angela Hospice will come to your home, so a family member or friend who is the patient's primary caregiver can rest or take time off. This gives you the opportunity to go shopping, relax, and get out of the house; use this time to your advantage to do whatever you need or would like to do.

ACTIVITY/RANGE OF MOTION

Range of motion (ROM) is the amount of movement available when moving a joint from a starting position to the ending position within the natural range.

ROM exercises are good for patients, and help prevent loss of movement in joints. Stretching muscles and ligaments can help slow down or prevent muscle atrophy.

Doing these exercises regularly will help maintain the health and flexibility of joints.

CHANGING BEDDING

The Hospice Aides can also change the linen and make the bed.

We have techniques we would gladly share and teach to help you change the linen, even if your loved one is bed-bound and cannot get out of bed.
